

2021-22 Case Mix Index (CMI) Results for Long Term Care (LTC) Homes with Classified Beds

Assessment Period: April 1, 2019 to March 31, 2020

Re-indexing Factor
0.9207

Highlights for 2021-22

- There were no methodological changes for 2021-22 CMI Calculation.
- Continued application of 5% funding stabilization floor, no home would lose more than 5% in their Funded CMI from the previous year.

Notes:

¹ Funded CMI is calculated based on a full year of data i.e. 12 months. Under the Nursing and Personal Care (NPC) CMI adjusted funding envelope, the 2021-22 funding allocation is based on a blend of 2020-21 funded CMI and 2021-22 funded CMI, the same approach as the funding allocations in both 2019-20 and 2020-21.

² Classified beds are beds for which the funding is adjusted for acuity. The classified bed numbers are shown as of FY2021-22.

³ 2021-22 Special Rehabilitation (SR) Limited CMI is the facility level CMI when calculated with a maximum of 5% of assessed days assigned to the Special Rehab RUG category

⁴ 2021-22 Funded CMI is the facility's 2021-22 SR Limited CMI multiplied by the re-indexing factor (unless the home was identified as an exception), limiting to a 5% decrease from 2020-21 Funded CMI

Glossary of CMI Terms is available at the bottom of this report.

GLOSSARY OF CMI TERMS

Home-Level CMI (or Reported CMI)	<ul style="list-style-type: none"> > This represents the CMI derived from the data reported by a home > The total RUG Weighted Patient Day (RWPDP) at a home level divided by the total assessed resident days in the Continuing Care Reporting System (CCRS) at a home level over the specified assessment period is the home level CMI.
Funding Stability Floor	The stability floor is applied to ensure that no home will have a greater than 5% decrease in the Funded CMI from the previous year.
Funded CMI	<p>Funded CMI = SR limited CMI x Re-indexing Factor</p> <p>This represents the CMI used for NPC funding and is derived following adjustments to the reported CMI.</p>
RUG (Resource Utilization Group) Weights	A measure of the average resource use at a RUG level and are used for calculating RUG Weighted Patient Days (RWPDP). The ministry currently uses the RUG weights from 2009.
RUG Weighted Patient Day (RWPDP)	<ul style="list-style-type: none"> > The number of days that get assigned to each RUG group based on the RAI-MDS assessments. > Each RUG group has a weight associated with it. > By multiplying each assessed day by the weight associated with the RUG, the RUG Weighted Patient (resident) Days (RWPDP) are calculated.
